Powerwall 3

Power Everything

Powerwall 3 is a fully integrated solar and battery system designed to accelerate the world's transition to sustainable energy. Powerwall 3 can store solar or grid energy for later use when the sun goes down or when the electricity prices are high; lowering their electricity bills, reducing their reliance on the grid, and power their homes during a grid outage. Once installed, customers can manage their home energy system using the Tesla App and customize system behavior to meet their energy goals.

Powerwall 3 has the ability to store up to 13.5 kWh of energy and start heavy loads rated up to 185 A LRA, meaning a single Powerwall 3 can support the power needs of most homes. Powerwall 3 is designed for fast and efficient installation and modular system expansion. With multiple Powerwall 3 units and/or **Expansions**, it is easier and more affordable to scale up customers' systems to provide 44 kW AC of continuous power and to store up to 94.5 kWh of energy.

Powerwall 3 Technical Specifications

Customer Interface Tesla Mobile App	Protections									
	Customer Interface			Tesla Mobile App						
Warranty ⁶ 10 years	Warranty ⁶			10 years						

¹Values provided for 25°C (77°F), at beginning of life. 3.3 kW charge/discharge power.

² Powerwall 3 can output up to 15.4 kW AC power at 64 A and 240 V.

 $^{^3}$ Typical use case with energy produced by PV and stored in battery and then released to loads or the grid.

⁴ Tested using CEC weighted efficiency methodology.

⁵ The customer is expected to provide internet connectivity for Powerwall 3; cellular should not be used as the primary mode of connectivity. Cellular connectivity subject to network operator service coverage and signal strength.

⁶ Powerwall 3 must be reliably connected to the internet to secure the full 10-year warranty.

Powerwall 3 Technical Specifications

Environmental

Solar Technical Specifications

Maximum Solar STC Input	20 kW
Withstand Voltage	600 V DC
PV DC Input Voltage Range	60 — 550 V DC
PV DC MPPT Voltage Range	60 — 480 V DC
MPPTs	3
Maximum Current per MPPT (I _{mp})	26 A
Maximum Short Circuit Current per MPPT (I _{sc})	30 A

Environmental Specifications

Operating Temperature 7	-20°C to 50°C
Operating Humidity (RH)	Up to 100%, condensing
Storage Temperature	-20°C to 30°C, up to 95% RH, non-condensing, State of Energy (SOE): 25% initial
Maximum Elevation	2000 m
Environment	Indoor and outdoor rated
Enclosure Rating	IP55
Ingress Rating	IP67 (Battery & Power Electronics) IP55 (Wiring Compartment)
Pollution Rating	PD3
Operating Noise @ 1 m	< 50 db(A) typical, < 62 db(A) maximum

Compliance Information

Certifications IEC 61000-6-1:2016, IEC 61000-6-3:2020, IEC 62477-1:2022, IEC 62109-1:2010, IEC 62109-2:2011, IEC 62933-5-2:2020, IEC 62619:2022, UL 9540A, UN 38.3, Radio Equipment Directive 2014/53/ EU, G98 Issue 1 - Amd 7:Oct 2022, G99 Issue 1 - Amd 9:Oct 2022, G100 Issue 2 - Amd 2

Mechanical Specifications

Dimensions ³	1105 x 609 x 168 mm
Total Weight	118.5 kg (wall-mounted unit with glass front cover and bracket)
Weight of Expansion Unit	110 kg (without glass front cover and bracket)
Mounting Options	Floor or wall mount
Stacking Capability	Up to (3) Expansion units behind a Powerwall 3 (floor mount only)
O	

Compatibility with Other Systems	Only compatible with Powerwall 3		with
Connection to Powerwall 3 or Expansions	Expansion harness		
Expansion Harness Options	0.5 m	2 m	4 m

¹Powerwall 3 Expansion units are connected in parallel and are not field serviceable.

 $^{^2}$ Performance may be de-rated at operating temperatures above 40 $^{\circ}\text{C}.$

³ These dimensions include the glass front cover being installed on the Expansion unit.

Backup Gateway 2 Specifications*

Backup Gateway 2 is required for installing Powerwall 3 with backup functionality. It provides energy management and monitoring for solar self-consumption, time-based control, and backup operation. It detects power outages and disconnects Powerwall 3 from the grid to prevent backfeed and provide quick backup power. For the recommended backup configurations, see "Powerwall 3 Backup Example System Configurations" on page 6.

*Starting September 2025, Powerwall 3 can be installed without backup functionality. For this configuration, Backup Gateway 2 is <u>not</u> required. For the recommended non-backup configurations, see "Powerwall 3 Non Backup Example System Configurations" on page 8.
